

## The Technical Excellence Challenge – 2

### Ser-= (Series-stalemate)

#### Triple Excelsior with any of 64 possible combinations of promotions in the least number of moves

*For compositions that have the same number of moves, the second criteria is less number of pieces in the starting position. In case of an equal number of pieces, the third criteria is taken into account: type of pieces with the lowest number of points: Q=10, R=5, B/S=3 and P=1. Illegal setups, promoted pieces and King-in-check are not allowed. A promoted Bishop is allowed only if there are none already on squares of the same color (one set rule).*

17 composers participated in **The Second Mat Plus TEC**: Milomir Babić (SRB) - 64, Aliaksandr Bulauka (BLR) - 1, Vlaicu Crisan (ROU) - 4, Norbert Geissler (GER) - 8, Joachim Hambros (AUT) - 1, Ralf Krätschmer (GER) - 64, Zoltán Laborczi (HUN) - 64, Miodrag Mladenović (SRB) - 53, Zoran Sibinović (SRB) - 64, Henry Tanner (FIN) - 16, Gábor Tar (HUN) - 2, Arno Tüngler (GER) - 64, Jörg Varnholt (GER) - 34, Dieter Werner (GER) - 1, and together as co-authors Olaf Jenkner, Frank Richter and Michael Schreckenbach (GER) - 64 compositions. A total of 504 problems received, where are 360 x Ser-=17, 127 x Ser-=18, 13 x Ser-=19, 1 x Ser-=20 and 3 x Ser-=21. The superior "German team" (OJ + FR + MS) was the only one to send all its 64 compositions in 17 moves. The winning tasks of all 64 types of white Excelsior promotions are shown here, followed by the second and third places. Problems are sorted in A-Z promotion order, starting from BBB to SSS.

The record holders are: OJ+FR+MS = 59 (38), ZL = 16 (3), MB = 11 (1), AT = 8 (0), HT = 6 (0) and MM = 5 (1). The first number is the total number of task problems, and the number in parentheses is the number of unique records. So "*the German trio*" now has as many as 59 record compositions, and among them are 38 in which only they are the authors! Task positions discovered by 2 or more authors are either identical or mirrored or are shifted or some bP has been moved. The most economical task is with 9 pieces only, QRR-17-09-15 (5 problems). Task QRQ-17-12-16 was found by all of 8 mentioned authors (6 problems). The heaviest position is SSR-17-18-43, while for the type SBR, only one problem was composed in 17 moves (!) SBR-17-14-39, and the authors were, of course, Olaf Jenkner, Frank Richter and Michael Schreckenbach.

According to their own statements, the authors checked their problems (those in 17 moves) by computer (Gustav, Alybadix or Popeye). I didn't do that, and if anyone has doubts, let them check it themselves and report any inaccuracy.

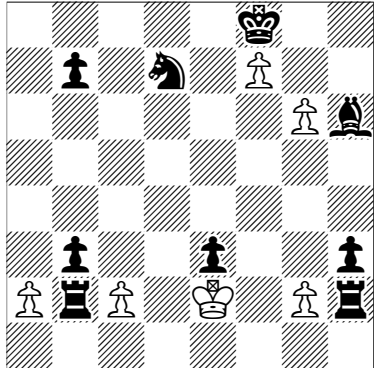

After the complaint period of four weeks and the correction of all possible errors, the results of the challenge will be officially announced at the beginning of August. Now there is an opportunity to improve these tasks. Composers are free to post their new task on the Mat Plus forum, which will subsequently be included in this collection of tasks

I would like to thank all the participants who made a significant effort, but I believe they also had the pleasure of discovering new possibilities in this challenge. Perhaps another interesting challenge will be prepared soon.

Borislav Gadjanski, *the administrator of the Mat Plus site*

On the left we see 2 problems that have the same code - the same Excelsior promotions in the same order, the same number of moves, the same number of white and black pieces with the equal total numerical power, but the pieces are different! Also, the final stalemate positions are different.
